Plastic Reconstructive Surgery

▶ Exclusive video @ njmonthly.com/pss-presti

I am one of the few surgeons in New Jersey with a double board certification in both facial, plastic, and reconstructive surgery and head and neck surgery. My expertise is in cosmetic, functional, and reconstructive surgery of the entire face.

The most important thing I can offer any patient who comes to see me is time and experience. Every person is different and every face is different. It takes a lot of concern for a patient to pursue any type of surgery, whether it be cosmetic or reconstructive. Patients can be timid and even fearful. Therefore, I take the time to explain all the available options. I've done thousands of cases during my career, and I use all that experience and know-how to address their specific needs.

The most enjoyable aspect of my job is being able to interact with patients on a daily basis. Each person I treat has a unique personality, history, and perspective. I get to know them and they get to know me. It's truly a pleasure. I have the unique

opportunity to help them, whether it's on a functional or cosmetic basis, and also get to know them as a person. I get to experience with them the joy and excitement of bringing to fruition the changes they hoped for through surgery and, in other instances, return to them what has been lost through trauma or illness.

• *DR. PAUL PRESTI is recognized by Select Surgeons Plastic Surgery as one of the top surgeons specializing in POST-MOHS RECONSTRUCTION (Eyelids) in New Jersey.*
